

## Dimitri Stephanopoulos

In light of the recent IPCC report on the impending climate chaos and doom it would be completely foolhardy to go forward with this project. Please consider what this would mean for a warming planet. Nothing is more important now than reducing greenhouse gas emissions and informing the public to reduce their carbon footprint. Otherwise, it's going to keep getting hotter and more unstable until the planet will no longer be able to support organized life. It's not that far off at the rate we are emitting greenhouse gasses.
