

## Sherry Hession

my name is Sherry Hirsch and I live in Spokane Washington. I am a concern citizen and grandkids that live near Longview, I'm against the project, against Canadian company shipping Frak gas to our state were a Chinese company to use our water to convert it to methanol. And then shipped back to China to make plastic or used for fuel. Or water and air are not for sale.

To make more plastic and bird methanol for Canadian and Chinese companies. Also the fires polluting the air now in Washington states are partly caused by drought in California, Washington and Oregon on. Millions of gallons of water are used for fracking oil. And there are millions of them. And this project would encourage more fracking and make our drought worse. Or fire equals more loss of life, property, unhealthy air and making everything unhealthy. My grandkids play in that water there. And now my granddaughter has trouble breathing. We need to invest in clean energy, I have been taking a poll on how many people are against this project.

I counted so far 51 to 11. 51 against, and please listen to the numbers and deny this project. Thank you.
