

Paula Overholtzer

Whoaaaa! This is just WRONG! I see that Northwest Innovation Works (China) has changed the NAME of the Kalama Methanol Plant/Project! I'm sure that this was done so that the project could slip through without notice by those of us who have been fighting this for YEARS! China and the USA are two of the main countries working to destroy this precious Planet Earth. Natural gas is not benign. It is another fossil fuel causing the climate crisis. Methanol spilled in the Pacific Ocean is not okay either. Nor is it okay to burn methanol as fuel in China, nor to make endless plastics from it!! This planet is severely abused by fracking and pipelines! Let's get past our throw-away plastics and reliance on fossil fuels. NO to the KALAMA METHANOL PLANT, under whatever name they have sneakily changed the project to!! Stand up for Planet Earth! Come on, Department of Ecology...you can do what's right!
