China is now considering going carbon neutral.

<https://www.euractiv.com/section/energy/news/china-considers-going-carbon-neutral-peaking-emissions/>

This move demonstrates the volatility of the fossil fuel markets and how foolish and dangerous it would be to bet on an indefinite continuation of ecocidal trends. Now is the perfect time to reject the dangerous and damaging projects of a zombie industry, before anyone has to shop their products around and pretend that they're still needed in the 21st century. Reject the Kalama methanol plant.
