

Mason Evans

My name is Mason Evans

I am the President of JH Kelly – a proud union construction firm headquartered in Longview WA

I value the environment and support actions that reduce global greenhouse gases - particularly the use of transitional feedstocks and new manufacturing technologies

I support the Kalama Methanol Project because:

- It brings much needed jobs to Cowlitz County
- The project incorporates important features that benefit the local environment such as zero liquid discharge, ultra low emissions technology, and a commitment to mitigate for WA air emissions
- Most importantly, the project reduces global greenhouse gases

After reviewing the supplemental EIS, I find it to be comprehensive and utilize a valid methodology to evaluate the project.

For these reasons, I encourage the Department of Ecology to accept the conclusion of the EIS and issue the Shoreline and other necessary permits for the Kalama Methanol Facility.

Thank you
