Northwest Innovation Works has demonstrated that they are deceptive and will seek profit over people's wellbeing. They cannot be trusted to mitigate the impacts of this fracked gas refinery. The fact that the project has needed three reviews, with outspoken community opposition during each, shows that there is something wrong with it at its core. As Governor Inslee stated, we cannot support such fracked gas projects in good conscience.

Why are we even considering trusting the health and safety of our state to an organization that has demonstrated such a history of dangerous lies for profit? Cancel the project. With a project of this scale, they would be a massive drain on state regulatory resources just to keep them within the dangerously-permissive pollution regulations that they've admitted to. It's foolhardy. Their greed will kill people like so many other projects before if they are allowed to build this facility.
