

Marianne Petersen-Ries

Hopefully this extension of licensure of the methanol plant will NOT be approved. With all the global warming and our forests going up in flames, this does not seem appropriate. NPR reported this facility of having a fire. They put it out with sand, but, when the Fire Department came, they locked the gates and would not allow them on the property...this facility seems to be corrupt to me. We need more overwatch for facilities like these. Lives depend on it, children, parents, everyone deserves clean air and a good life. Thank you for listening.
