

Julie Glover

I am very upset that Northwest Innovation Works, LLC. proposes to develop and operate a natural gas-to-methanol production plant and storage facilities on approximately 90 acres at the Port of Kalama. THIS IS CRAZY! Methanol will be loaded on to ships at a new dock that will be owned by the Port and transported to Asia. SO WHY ARE WE POLLUTING OUR OWN LAND AND AIR SIMPLY TO BENEFIT CHINA?

The Second Supplemental Environmental Impact Statement focused on fully analyzing greenhouse gas emissions from the proposed Kalama methanol facility, looking at impacts from upstream emissions, such as the greenhouse gases that escape from natural gas wells and pipelines, direct and indirect emissions produced at the facility, and downstream emissions from transporting the methanol to its intended destination in China. IT MAKES NO SENSE TO ME THAT WE WOULD WILLINGLY UNDERGO ALL THIS POLLUTION FOR THE BENEFIT OF A FEW MONEYMAKERS, BUT NOT FOR THE AMERICAN PEOPLE WHOSE HABITAT IS BEING ENDANGERED!
