

## M Aufrecht

Stop the Northwest Innovation Works (NWIW) Methanol refinery proposal in Kalama. NWIW's proposed facility would be enormously polluting in Washington State.

The argument that If we don't build it, someone else will, is a terrible reason to move in the wrong direction. Now is the time to remove fossil fuel infrastructure, not build more. It is time to urgently address the dangers of climate change by investing in alternatives.

Please keep our communities safe and keep Washington on track to meet our goals for reducing climate pollution.
