

## Sharon Abreu

I am a 19-year resident of Washington State, and I've been a climate change educator for over 20 years. I am of the strong opinion that the Kalama Manufacturing and Marine Export Facility is a danger to our local waters and marine life in northwest Washington State and a danger to our whole planet due to the greenhouse gas emissions of the fuels processed there. It is time to move away from fossil fuels and create well-organized, well-funded Just Transition programs to replace those jobs.
