

Col Pederson

I am AGAINST this on so many levels- fracking is a PROVEN disrupter of the environment. 1-let's start with CLEAN WATER, which is a resource that is becoming in shorter supply. 2-And the release of toxic chemicals into water and air. 3-AND for which planned use is to make PLASTIC which is already harming sealife and environment!! 4- and the quakes which often follow. The risks have been under-reported/minimized to promote industry. *SAY NO to this project!!
