

## Danny Percich

Don't allow the world's largest fracked gas-to-methanol refinery to harm our climate and Kalama! Washington should reject Northwest Innovation Works' (NWIW) proposal to build and operate the world's largest fracked gas-to-methanol refinery in Kalama. NWIW misled your agency, and the public, about the purpose and impacts of the refinery. We are counting on Ecology to dismiss NWIW's misleading claims and accurately account for the project's upstream and downstream climate pollution.

For the community of Kalama and for our climate, the risk is simply too big. Please keep our communities safe, and keep Washington on track to meet our goals for reducing climate pollution. We are counting on you to do the right thing and stop this dirty, dangerous fossil fuel export project.

In this moment of a top down attack against science, we need to stand up for science and look hard at how a this refinery will pollute and effect our communities. As a father of 3 and owner of a small farm, we need to protect our future.

Sincerely,  
Danny Percich
