

Natalie Reich

You have already received boatloads of expert testimony from experts and other concerned citizens. I simply want to add my name to those who are opposed to this behemoth of a fossil fuel project. Given the abundance of evidence that we are already in the thick of climate catastrophe, we cannot put off acting if we have any hope for a healthy existence now and in the future.

Thank you for saying NO to the Kalama Marine Manufacturing and Export Facility currently proposed, and to any future proposals.

Natalie Reich
