

## Derya Ruggles

With all due respect, I am astonished we are even considering this dangerous, damaging and antithetical to all reason and science proposal!

The proposed NWIW methanol refinery would cause millions of tons of greenhouse gas pollution each year, for 40 years.

Ecology should deny the Shorelines permit for the refinery.

It's Time to Pursue a Truly Low-Carbon Future. Please do not put profits over people and sell-out our healthy future. How much more science and protestation from the people do we need to wake up? Deny this monster before it becomes a nightmare we all cannot wake from. Thank you so much. Sincerely, Derya Ruggles, very concerned community member
