

Iris Antman

Thank you my name is Iris dash mac I'm a resident of 30 plus years in Seattle Washington. And for the folks who have spoken in favor of this because of the need for jobs, I hear you. And being able to provide for our families. However we won't have a family if this project goes forth. Climate crisis, climate emergency is here now. And any buildout of any kind of fossil fuel project is the wrong direction and we will know this. And so let's instead turn our resources, creativity, expertise, skills, towards providing clean energy and that's where the efforts should be. Please, do not, put in fewer greenhouse gases into the air is not okay. We need to put-- thank you very much.
