

Elizabeth von Dassow

I am completely against the Kalama Refining and export facility that is planned due to the ecological (negative) impact. We are suffering already from the effects of climate change in this region, from wildfire smoke and dying orcas (i.e. economy) to altered food growing abilities and uncharacteristically hot summers. We don't need more climate change, which is what this plant will do, and in a very big way. We need solutions. I cannot, in any way, support this project.
