**Kalama Manufacturing and Marine Export Facility Second Supplemental EIS**

I Encourage the Department of Ecology State of Washington To deny the NWlw application. The facts are the project would add a total of 3.6 million metric tonnes of green house gas emissions per year .This is totally unacceptable. We as citizens of Kalama insist you deny the proposed project.

Thank you  
Teresa Flynn

This Methanol Refinery will pollute our town and State of Wa. This location is a Migratory Bird route We dont need the fracked gas, The pipeline, and damage to our environment. It also a gluttonous use of gas

Thank you.

**Kalama Manufacturing and Marine Export Facility Second Supplemental EIS**

The Department Ecology needs to dismiss the speculative basis for this proposed project. The idea they would displace more polluting facilities using coal is not proven. Washington State needs to protect our citizens, living things, and resources. No Kalama Methanol Refinery! Teresa Flynn Kalama, Washington

My husband John & I retired to Kalama, Wa. NWIW is proposing to build a fracked gas to Methanol refinery here. There is no way this project would reduce carbon emissions, in fact it would increase carbon pollution in huge amounts. This is their shell game and we would be the losers. Dept. of Ecology needs to protect the citizens from this Polluting nightmare.

Thank you

Kalama Manufacturing and Marine Export Facility Second Supplemental EIS

This proposed Methanol Refinery by NWIW does not meet the State of Washingtons goals for reducing climate pollution. No Kalama Methanol Refinery! Thank you Teresa Flynn Kalama, WA.
