Woodsy Owl says "GIVE A HOOT, DON'T POLLUTE."

I oppose the Kalama Fracked Gas to Methanol Refinery Project and request the permit be denied.

The SSEIS clearly shows this project will be a major greenhouse gas polluter. We already know methanol is a fast acting greenhouse gas with enormously negative climate impacts. It leaks at every stage of production and transport.

The clock is ticking for our planet and we need to invest in renewable energy NOW. We just saw record breaking temperatures in California and another raging fire season is starting early. The CLIMATE CRISIS cannot wait. Let's lead the way in creative investment in renewable energy jobs and infrastructure that will benefit everyone for generations to come.
