

Debbie Tomasovic

I am fearful for our future, if this plant begins producing all of the pollution it is predicted to produce. Let's not continue to be part of the very problem we are needing to solve. The health and well being of our citizens and planet are at stake. Washington cannot contribute to the goal of keeping global warming "well below 2 degrees Celsius" by allowing major polluters to move forward. A low-carbon future demands investment in lower-emitting production processes.
