

Boilermakers Union Local 242

>> Thank you my name is Luke law fee, I made business manager Local 242, I support this on many fronts, jobs obviously 1,000 construction jobs over a three-year period. 200 permanent jobs in the community and another 500 indirect jobs. Not to mention 30 to \$40 million in the local tax base. Secondly technology produce methanol for natural gas is far better than for coal. Which is what the Chinese are doing without the regulations that we require. Methanol is not going way. I think it is hypocritical as we talk into plastic computers and phones and not to mention the plastic cars we drive down the road. We want these products but not in our backyard. It's always easier to say no rather than just work together to come to a common goal. All of my members are just as concerned about climate change as is everybody on the other side. So on a global level, this project is needed. That's all I have.

Thank you for your time.
