

# Joel Caldwell

My name is Joel Caldwell of Toledo Washington. I am writing to ask Ecology to please deny the project. 6 months ago my wife and I had our first child. Now the entire west coast seems to be burning in relations to the amount of carbon we have put in the atmosphere. Now is the time to scale back emissions and switch to Renewable energy, not build the world's largest fracked gas-to-methanol refinery.

For future generations we must scale back emissions and halt climate change. please deny NWIW's refinery in Kalama!

Thank you,

Joel Caldwell
