PO Box 461

Kalama, WA

98625

To Richard Doegnes;

These letters are from the children who will inherit whatever it is we leave them.

These last weeks, with fire, smoke, hurricanes, flooding, have gone on what feels like forever. This is climate change.

Not building a methanol plant in Kalama will not solve what our planet is facing, but it's a start. We have to adapt to climate change. If we do maybe these children will have a chance to maybe even a better life than we have had.

Please do not build a methanol plant in Kalama. (By the way, I'm 73 years old)

Thank you.

Julie Harrington

Please don't build a metal
plant in Kalama. I am 9 years
old. thank you
