- Take caution not to open attachments or links unless you know the sender AND were expecting the attachment or the linkDear Dear Central Region Director ParkThe Draft EIS finds that there will be “significant and unavoidable adverse impacts” to cultural and tribal resources. It also indicates that there is no proposed mitigation for these impacts that is supported by Tribal Nations. While renewable energy and grid resilience are important considerations as we tackle the climate crisis, so too is the need to achieve environmental justice and to prevent disproportionate impacts of energy development on Indigenous communities. “Clean energy” must not be built on the backs of Tribal Nations. Sincerely, Joyce WeirPO BOX 973Newport, WA991560973jaweir@povn.com
