Build the flow thru dam. Mud mountain dam protects the entire valley from puyallup to renton. Mud Mountain is permanent. The flow thru is brilliant. If Chehalis and Centralia just build levies to protect themselves, they are sending untold amounts of water down river for others to flood out for the first time or worse than ever before. My home, along with about 6 others was an island in 2007 near Grand Mound. Any more water than that is going to destroy all of our homes. I have been in this home for 22 years. The entities that have been working to stop the flooding have accomplished nothing that has really helped. China creek flooded Centralia this past year. If 2007 hits again, we are still in big trouble. Build the dam!
