

September Yew

Please so not take away precious habitat for the salmon our remaining orcas have to eat. This damn will negatively affect them and other species that depend on chinook to live. We love them so much. This damn will only add unnecessary suffering for the orcas by taking away Chinook habitat and forever changing the patterns and ecosystems that have adapted to this important river. Prioritize our endangered species and DO NOT build this dam. Our Orcas, they're worth it.
