

## Sego Jackson

As a former resident of Doty Washington, I do not support any dam being placed on the Chehalis River, and as a taxpayer in Washington State and the US, I do not support the use of any tax funds being used for a dam on the Chehalis River.

This special river is a huge watershed and one of the few undammed rivers on the entire West Coast of the US. During this time of dam removals, due to the inevitable impacts they have over time, it is out of step with reality to be proposing a new dam on a free flowing river. Other options are shown to be possible through the Local Actions Non-Dam proposal.
