

Linda Castell

I am opposed to building any dam on the Chealis river as the salmon are already struggling to survive in this once salmon abundant river. A dam on this river would irreparably damage the local tribes culture. The damage to the proposed building site would harm the existing wildlife as well.

There are already plans that would mitigate flooding in place.

Please do not build this dam in a time when we are tearing dams down to save our salmon.

Respectfully,
Linda Castell
