

Jeannine Bucher

My understanding of this proposal to insert a dam on the Cehalis is that the states environmental review concludes that it would harm the river and Salmon. Chinook Salmon are a large part of the endangered Southern Resident killer Orcas diet. Surely there are better solutions that protect people, Salmon and the SRKWs. The amount of money that it would cost for a plan that may not work is in my opinion not worth the risk of losing one our last rivers that produce Salmon. I oppose this action.
