

Angus Brackett

I'm concerned about the proposed dam project. This area of the river Chehalis is critical to our threatened salmon and steelhead. The area once flooded is gone. We have plenty of dams in sw Washington what we don't have is free flowing rivers. Support non dam solutions to flooding. My family has fished the free water for generations. Too much money and not enough resources to maintain the project and taking a resource from the people. All bad. No dam
