

## Tessa Hawkins

Please do not go ahead with the Chehalis damn project. That money is needed elsewhere. That was a solution for flooding in the area, we can rise to the challenge of using the logical and creative mind of a human being to be able to devise more inventive solutions.

Please do not move ahead with this infrastructure project. We can and must be better for all of the species in this world.

Thank you for your consideration of the opinions of people who live here and have little to no power in the machinations of such large products.
