The area of proposal will greatly affect the Chehalis tribe water rights. The Chehalis people continue to use the Chehalis river. It is a means of culture and living for fishing, harvest, eco system and wild life. As well as swimming to many. What is being purposed to me is not lawful. Per law, the tribe has treaty rights of the water and its cultural significance and it is the Chehalis people's way of life. There fore should be left alone. The Chehalis people continue to say no to this purposed idea and others that have been brought forth. I have seen for myself, water treatment facilities create sludge to try and alter water ways. I have seen for myself corrupt people attempt to ruin the waters eco system and the way the water flows. It is not the way and the water should be protected and not altered. I am a Chehalis tribal member and I grew up on the Chehalis river, I am against this purposed idea.
