

Valerie Herron

I am opposed to this dam. The people of Lewis County do not want this dam. We have been saying this for over 2 decades now. It will cost over 2 billion dollars of tax payer money, the tribes are against it, local fishers and hunters are against it, and why risk putting the town of Pe Ell under water? The era of dams are over, billions of dollars are already going into removing dams in this state. We need to invest in natural mitigation strategies, already proven to being more effective than dams.
