

Vince Panesko

Why has a \$13 million dollar Airport levee been held up by a \$1.7+ billion dollar dam which has continuous difficulties and delays?

If the Airport Levee had been a separate project, it could have been funded and constructed years ago.

The Office of Chehalis Basin and the FCZD should issue a separate EIS for the Airport levee because it has no major complications or mitigations which need years of resolution.

This seems like a no-brainer.
