

Jack McLeod

Dear Department of Ecology,

I'm writing to object to the proposed FRE dam on the upper Chehalis River. To spend over \$1billion on a project with geological uncertainties and HUGE environmental costs, and no long-term funding for maintenance and operations is a boondoggle. Simpler, more timely, less costly and more effective solutions surely must exist.

Do not fund this project.

Thank you for acting in the name of common sense.

Jack McLeod
