

David Parks

As a taxpayer, I am absolutely opposed to a new dam on the Chehalis River. I worked extensively on the Elwha Dam Removal Project, and the benefits from a free flowing river greatly outweigh any perceived benefits of installing a new dam on the Chehalis River. In fact, installing a dam will cause great economic and ecological damage to the the Chehalis River watershed and will violate the Treaty rights of First Nations peoples. Do not build a new dam on the Chehalis River.
