

## William Errico

I have been instructing fly fishing for over 25years. Not only has it been an environmental and educational sport for Scouts and nationally to all ages.

In addition, fly fishing has been an excellent re-ablative tool for inner city youth, Scouts, disabled Vets and Brest Cancer survivors.

Without fish, especially Salmon and the other salmonoid variants, fly fishing would not provide these opportunities and revenues to the level generated in the US and around the world.
