This project is a farce and complete affront to healthy rivers and salmon runs on the chehalis river. Billions of dollars to make the port of chehalis/centralia more attractive to more fast food restaurants, it's a joke. This project was doomed from the start so the fact the flood control board wants to waste more of their time and energy on this is mind boggling. This project threatens to endanger tribal treaty fishing all to keep some water out of the home depot parking lot in chehalis.
