

## Bonnie Carson

Thank you for the opportunity to commit on this important issue. I am Bonnie Carson and I am a new resident to Washington state. This is a wonderful place to live and I hope we can all keep it ecologically healthy. I have seen in this past year flooding is a problem, however anytime we humans try to force nature to bend to our will it does not work out well. Please consider restoring flood plain connections and moving homes out of harms way as an alternative to building a dam on the Chehalis river.
