

Lauren Swift

Please don't build another dam. Dana are being REMOVED because they are so harmful. My biggest concern is damage to salmon populations and habitat. We need to do all we can to improve salmon runs and help the local Orca population. We will otherwise lose this iconic species. I can't imagine how this could be allowed to go forward, but I assume the Endangered Species Act is being skirted by using only local funding. There are other solutions that don't have "significant unavoidable" impacts - the impacts can't even be mitigated! Cultural resource loss is also a concern.
