

Michael King

I oppose construction of the proposed dam on the Chehalis River. The dam will destroy critical spawning and rearing habitats for wild salmon. Wild salmon, in turn, are essential to the endangered 73 remaining Southern Resident killer whales. Please rethink this ill-conceived project. There are other alternatives for flood control such as the Local Action No-Dam (LAND) Alternatives that promote options like floodplain restoration, improved drainage systems, levee improvements, building elevation, voluntary buyouts, and land use planning. Thank you.
