Natalie Hibbard-Pelly

Hi I am in support of shutting the parkway down to cars and having a two way bike loop around the whole park similar to green lake in Seattle. I do not support more car lanes or a car focused roundabout being built when going up the hill in the road on a bike is already so terrible. Going uphill in a roundabout is very difficult to k3ep speed for non electric bikes. We need to plan for the rail line bike trail conversion by making the infrastructure more capable for bike traffic than needed at this time.
