Allen Miller

The North Capitol Campus Heritage Park is based on the City Beautiful Movement design for the State Capitol Campus dating to 1911 by Wilder and White and as updated in 1996 by the Portico Group. The Arc of Statehood with the 39 County markers, trail, and the end points of the Eastern Washington Butte and the Western Washington Inlet celebrate the heritage of the State of Washington and need to be preserved and enhanced to continue that celebration of our history. The Eastern Washington Butte needs to be improved as a better representation of the history and landscapes of Eastern Washington and the County markers should be remounted in a way that they are more accessible and readable.
