

## Pamela Johnshoy

This is crazy. By increasing the gas tax for commercial trucking, the cost is directly passed on to the consumer. Basic economics. We are not California and if the elected officials continue to copy what California is doing, people and business leave Washington. We moved here in 1994. It was affordable. Now it's not. Poor leadership and poor decisions have caused Washington to be a very expensive state to reside in. Please do not increase the tax for commercial trucking, please get rid of the \$.06 gas tax as well as the \$.50 tax that goes to fund projects to reduce global warming. All it does is lead to higher prices with no or little benefit.
