

Roxanne Thayer

We are quickly losing access to breathable air, in all communities! Please support Chapter 173-423 WAC, Clean Vehicles Program Rulemaking.

Do not ease compliance--The Advanced Clean Trucks program applies to medium- and heavy-duty engine and vehicle manufacturers. It requires manufacturers to gradually sell more new zero-emission models in Washington through model year 2035, and provides flexibility by allowing manufacturers to purchase credits from other manufacturers to meet this requirement and choose which models to transition to zero-emissions technology. The Heavy-Duty Low NOx Omnibus regulation applies to heavy-duty internal combustion engine manufacturers and requires them to meet more protective air quality standards, particularly on oxides of nitrogen and particulate matter, starting in model year 2026.
