

Viola Rosengren

We live in beautiful Washington not in California. Please govern us with more attention to the actual science that shows that all the rules and regulations and taxes related to ecology are not really improving our environment. Please consider the people who live in Washington, and cut the rules and taxes California politicians think make sense, and govern us in such a way that we may live happy, normal lives rather than being impoverished by taxes and dumb rules that make our lives so much more expensive!
