

Bonnie Blessing-Earle

I appreciate your efforts to reduce greenhouse gases by this proposed rule. I had a sister who worked in a large shop with alot of diesels. She died of cancer. The rest of family are fine so we always wondered if it was air pollution. If any of these rules can help others stay healty, well I'm for it. I do see alot of delivery vehicles use electric. it seems possible. When I worked as a construction flagger for a few months, well, I quit because I had to park my lungs next to a highway of diesel trucks. Please make it reasonable enough so some of your steps can indeed be used.
