

Celeste Maris

DOE needs rules to reduce pollution, so we can have fewer respiratory problems and to avoid premature deaths. We need strong vehicle emission standards. Vehicle manufacturers need to make and sell less-polluting vehicles.

Clean vehicles and clean air. We need a robust EV infrastructure across the state.

We have had our EV for 5 ½ years, and we need to find ways for more residents to replace their ICE vehicles. And businesses need to follow suit with their vehicles--many of which are driven locally only and are amenable to EV technology.
