

Greg Boyd

Why does Washington continue to follow CA failed emission, tax and burdensome laws? Washington state needs to decouple from CA before it's too late. Increased taxes are killing the WA population and will force thousands to flee the state. There is no good reason why WA fuel taxes are as high as they are, try eliminating some needless programs and lower the taxes. I have lived in this State for 27 years, looking to leave as it is crazy expensive to continue to live here. Do something before it's too late!
