

Michele Lounsbury Griffin

As a person with asthma and chronic sinus issues, clean air is vital for maintaining a functional life.

As a grandparent, doing all I can to ensure our world can maintain itself safely for generations to come is vital for the safety and security of the people who will continue living here long after I am gone.

Please maintain, and even strengthen, regulations that decrease pollutants from vehicle exhaust and the manufacturing process. Focus on the global needs of human beings, not corporate profits.
