

Susan Kane

Hi. Um, first I'd like to thank you for the information that you provided during this webinar. It was very specific, and I understand things even better now. I will say that I'm a generalist, and I'm going to be speaking about overall. Um, outcomes. My name is Susan Kane, S-U-S-A-N. K-a-n-e. I'm from East Wenatchee, and I am concerned about my grandchildren's future. As an individual, I am doing everything that I can to lower my carbon footprint. I drive an electric car, I have cut way, way back on the amount of meat that I eat. I do not fly by air when I travel. And so, I'm doing what I can. And that's why I'm here today. I can't do much more on my own. I really need your help, and I support these rule changes, because we must transition to zero-emission trucks and vans if we really want to have a chance to meet our climate targets. Now, would you do one thing with me? Could everybody just take a big breath? And exhale. Well, that really helps me calm down; I've never done this before. Now imagine that you are stuck behind a big diesel truck that is moving forward. We've all been there, and sucked in that disgusting vapor. Which of these breaths do you want your grandchildren breathing? You are making a decision that affects the very air we breathe, and I really appreciate you for listening to me. Thank you.
